SPECIMEN — not an inspection of a real property

What a Property Check Sydney report contains

- Report title, unique reference, customer and property details.
- Inspection date, inspector name and service type.
- Scope, summary and the limitations that apply to the service.
- Photographs at a readable size, with category and caption.
- Observations and,

where booked, measurements.

- Any additional requests recorded at the property.

A customer can download a report only after administration has approved and released it. This specimen is a layout description. It is not a sample of a completed inspection.
